Art Unit: 2654

1. Applicant's correspondence filed on 2 January 2004 (papers #22-24) has been received and considered. Claims 1-8 and 10 are pending.

Claims

2. The applicant is referred to the rejections of claims 1-8 and 10 in paper #15 under 35 USC 103 and the additional comments below.

The use of speech commands is inherently a hand-free operation because a person does need to use their hands in order to speak. The use of wireless (cellular) technology allows circuitry to be placed in a wide variety of physical locations. For example, it is common practice to implement the processing necessary for speech recognition and synthesis in a computer located at a central facility within a telephone network. Therefore, it would have been obvious to communicate data between a handset and other circuitry regardless of physical location. The combination of elements to perform the claimed operations is addressed in the previous rejections.

In paper #24, the applicant's only comments are to the addition of adding "transmitting said short message calling signal to said handset" (claims 1, 5 and 8). This is taught by Schwelb's short message service (SMS) in combination with cellular telephones as previously noted (see paper #15, page 4). It is not believable that one of ordinary skill in the art of cellular technology would find it unobvious to transmit messages to a handset.

Schwelb's requirement for the conventional cellular service receiving a short text message (col. 2, lines 54-60) to have a voice synthesizer for text-to-voice conversion (col. 1, lines 49-52) is supported by the combined speech synthesizer 130 of Gerson (figure 1).

Art Unit: 2654

Therefore, the combination of references is obvious (as previously shown) because their teachings are for similar purposes and the combination includes all elements necessary to transmit and synthesize a short message as claimed.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
